

HORN Human Nutrition is the industry source for science-based innovations and best-in-class ingredients.™ Our Innovative Ingredients Division is dedicated to the research and procurement of new, cutting-edge ingredients for progressive marketers. Only products with sound scientific backing, demonstrated efficacy, IP protection and a clear value-add for our customers are selected. Below is a summary of the ingredients in our innovative portfolio. Please contact your HORN account manager for more detailed information and to request a sample.

SloIron® – Nature's Iron Concentrate ^{New!}

SloIron, the first ferritin-iron supplement from plants, provides gentle, nutritionally available iron in an efficient, vegan form naturally present in legumes. The ferritin protein molecule delivers an average of 2,000 iron atoms contained inside a protein cage that releases iron on demand in a controlled and efficient manner; thus preventing gastric distress caused by most iron supplements and avoiding potentially toxic iron overload.

ChalCurb™ – Visceral Fat Reduction

ChalCurb is a new ingredient that addresses the rarely talked about visceral fat also known as the abdominal fat that lingers around the belly. Manufactured by Japan Bio Science Laboratory (JBSL-USA), ChalCurb is a proprietary plant extract that contains more than 20 potent and rare flavonoids called chalcones that reduce visceral fat by more than 10 percent.

ErgoMAX™ – Natural, Organic Vitamin D

ErgoMAX by Guzen Development is a vegan-friendly powder naturally high in vitamin D2 (bioidentical to D3). It is purely made from certified organic mushrooms cultivated and processed in the U.S., and retains all the micronutrients found in whole mushrooms.

NSK-SD® Nattokinase – Cardiovascular Support

Backed by more than 25 years of research and scientific testing, NSK-SD promotes fibrinolytic activity for healthy blood flow and overall cardiovascular function. Manufactured by JBSL-USA, NSK-SD has the highest proven potency of any Vitamin K2-free nattokinase on the market.

Nutri-K JN™ – Bone and Heart Health

Nutri-K JN is an advanced, all natural form of vitamin K2, menaquinone-7 (MK-7), that serves vital roles in bone development and cardiovascular health. Manufactured by Nutri Granulations, a division of HORN, Nutri-K is highly efficacious and is the most bioavailable, bioactive, long-lasting form of vitamin K. Multiple potencies are available in oil and powder products for a wide range of applications.

OPtain120™ – High Blood Pressure Management

OPtain120 addresses systemic hypertension which affects an estimated 67 million adults in the U.S. according to the Centers for Disease Control and Prevention. Manufactured and patented by Ryusendo, OPtain120 reduces systolic blood pressure by six percent and can be effective in as little as five days.

These statements have not been evaluated by FDA. These products are not intended to diagnose, treat, cure or prevent any disease.
